Subject: Re: Interagency Perchlorate Steering Committee teleconference for member agencies 

The NMED person that is most involved with the Perchlorate issue is Julie Wanslow 505 827-1561 x1023. Her e-mail address is: Julie\_Wanslow@nmenv.state.nm.us

I will call you today to talk to you further about this as I going to call ADEQ (Ark Dept of Env Qual) and ODEQ (Oklahoma) to see if they are interested in participating. Does it look like we will have enough lines for them?

ODEQ is just now getting involved with the Perchlorate issue. ADEQ did attend the Perchlorate Stakeholder's Meeting in Temple last year. Thanks.

Hi Deb,

Per my voicemail message today, please let me know either via voicemail or preferably Lotus Notes, an email address so that I can include the NMED rep. on the distribution list for the call-in information.

If you have any questions, call me tomorrow at 415/744-2182.

Thanks,  
Catherine

Hi Catherine,

NMED gave me "call-in number" for you to call them at to link them to the conference call. It is 505 827-1557, ask to connect to 1060. Will this work with your set up or should we insist they call in? Thanks!
